Passionate experts dedicated to fragrance and well-being

Laureate of the Vivatch LVMH Prize, recognized in the French Tech community and worldwide, Compoz Paris is a leading French brand founded by three fragrance and innovation enthusiasts: Aymeric Wuidart, David Lopez Bonet, and Xavier Pourcines.

Known for its technological excellence combined with a French artisanal signature, Compoz Paris advocates for natural and responsible perfumery, serving the most precious natural raw materials, for the pleasure of all.

The idea of creating a “digital perfume organ,” “entirely natural,” “smart and connected,” emerged in 2016 as an obvious choice for them.

Their goal: to harness the power of scent to enhance everyone’s daily well-being—at home, at the office, while commuting, and when traveling.

The method: enabling everyone to create and diffuse the scents of their choice in seconds, and to change them with a simple click.

However, a few imperatives accompanied this beautiful idea:

Ensure healthy and respectful diffusion: to address health issues with existing systems.

Offer 100% natural origin perfumes: for their combined virtues and unparalleled olfactory pleasure.

Develop an engaged and responsible brand: to align with their convictions.

Gathering a talented multidisciplinary team and renowned international partners, it took them 5 years of Research & Development to overcome technological barriers and give birth to Compoz Paris and its patented real-time diffusion and blending technology.

“ *Because the art of perfuming one’s interior is an unparalleled ritual, Compoz Paris has developed an exceptional object: the Compositeur.* ”

A unique and intuitive connected device that can be controlled and programmed, delivering a custom-tailored, 100% immersive diffusion experience with no lingering scent.

— Aymeric Wuidart, Co-Founder Compoz Paris

The ideal solution for enclosed spaces

Delivers optimal fragrance diffusion in areas from 5 m² to 70 m².

Biomimicry

INSPIRED BY HOW SCENT
NATURALLY TRAVELS
THROUGH THE AIR

Biomimicry is an approach that learns from the way nature works and applies its principles to human design.

Compoz technology follows this approach by recreating the natural movement of scent through the air.

It releases fragrance molecules without heat, water or combustion, creating a clean and refined olfactory experience.

— Aymeric Wuidart,
Co-Founder Compoz Paris

Choose from 10 scent ambiances in 1 click

Each guest can personalize their room atmosphere by selecting one of 10 exclusive scent ambiances, with a scent to suit every preference. Designed to create moments of relaxation, comfort and escape.
